Author Index to 1989

Aage Fredenslund
——Peter Rasmuss en
On the possibility of predicting phase equilibria from molecular structure 115
Bao Jinming see Jiang Zhiheng 147
Cai Lei see Wang Chaoyang 275
Chen Jiayong see Deng Tong 51
Deng Tong
——Chen Jiayong
Kinetics of phase transfer catalyzed disproportionation of elemental sulfur 51
Din Baiquan see Huang Libin 34
D.J. Chessman see Jin Yong 26
Dong Gian
——Yan Xinjian; Xu Zhihong
Study and improvement of Rihani–Doraiswamy estimation method for C°_{p} with computer program 73
Dong Wenbao
——Yan Hexin; Zhang Liaosheng
Dynamic simulation for a multistage countercurrent extraction process 134
Fang Dingye see Song Weiduan; see Zhong Yaling 258
Fei Weiyang see Qian Yu 218
Fu Jinyan
——Wang Kun; Hu Ying
Studies on vapor–liquid and liquid–liquid–vapor equilibria for the ternary system methanol–methyl methacrylate–water
(I) Three binary systems 1
(II) Ternary system 14
Gu Junjie see Huang Hongding 286
Han Wu see Yang Minzhi 93
Huang Hongding
——Gu Junjie
Flooding in vertical tubes 286
Huang Libin
——Zhu Bingchen; Xu Maosheng; Sun Qiwen; Din Baiquan
Multicomponent diffusion model for effectiveness factors of porous catalysts (III) Effectiveness factors of high–temperature shift reaction catalyst WB–2 under pressure 34
Hu Yin see Fu Jinyan 1, 14
Hu Zongding
——Yu Baotian
Local holdups and liquid interstitial velocity in large–diameter three–phase fluidized bed 43
Jiang Tiqian see Jiang Zhiheng 147
Jiang Zhiheng
——Tang Yinnan; Bao Jinming; Jiang Tiqian
A mathematical model for oxygen transfer in flat plate membrane oxygenator 147
Jin Yong
——Yu Zhiqing; P. N. Rowe; D.J. Chessman
The estimation of the dense phase voidage of a gas fluidized bed 26
J. Robert Selman see Yang Minzhi 93
Li Daotang
——Tu Jinlin; Shi Yajun
Studies on kinetics of desorption of CO_2 from hot carbonated potash solution with DETA (diethylenetriamine) as a catalyst 59

Liu Kunyuan see Wang Wenchuan 264
Lu Bingling
Studies on phase diagram in the process for production of urea soda-ammonium chloride 229
Pan Zuren see Zhu Xiulin 206
Peter Rasmussen see Agae Fredenslund 115
P.N. Rowe see Jin Yong 26
Qian Yu
——Fei Weiyang; Wang Jiading
A study on mass transfer in pulsed sieve-plate extraction column 218
Shi Yajun see Li Daotang 59
Song Mingshi
Studies on the relationship between the network structure and the mechanical properties of rubber vulcanizates
(I) Theory of elasticity for rubber vulcanizates with carbon black fillers in large deformation 162
——Zhang Huanzhi
(II) The reinforcement of elastomers by carbon black fillers and its characterization 178
Song Weiduan
——Zhang Junli; Zhu Bingchen; Wang Hongshi; Fang Dingye; Zhu Mingjiao; Sun Miwen
Kinetics of methanol synthesis in the presence of C301 Cu-based catalyst (I) Intrinsic and global kinetics 248
Sun Qiwen see Huang Libin 34; see Song Weiduan 248
Tang Yinnan see Jiang Zhiheng 147
Tu Chuanjing see Wang Chaoyang 275
Tu Jinlin see Li Dao Tang 59
Wang Chaoyang
——Tu Chuanjing; Cai Lei; Yan Ling
Condensation heat transfer of vapor-gas mixture in turbulent flow through an annulus 275
Wang Changying see Yu Yuguo 195
Wang Dahui
Comparison of three methods to predict adsorption isotherms for organic vapors from similar and non-similar polarity reference vapors 298
Wang Hongshi see Song Weiduan 248
Wang Jiading see Qian Yu 218
Wang Kai see Zhu Xiulin 206
Wang Kun see Fu Jinyan 1, 14
Wang Wanchuan
——Liu Kunyuan
Calculations of vapor-liquid equilibria for hydrogen-containing systems with modified Peng-Robinson equation of state 264
Wu Hua
——Yuan Quan; Zhu Baolin
Activity distribution in pellet for maximum effectiveness factor
——General nonisothermal bimolecular reaction 83
Xu Malsheng see Huang Libin 34
Xu Zhihong see Dong Qian 73
Yang Minzhi
——Han Wu; J. Robert Selman
A cycling performance model for the zinc/ferricyanide bettery 93
Yan Hexin see Dong Wenbao 134
Yan Ling see Wang Chaoyang 275
Yan Xinjian see Dong Qian 73
Yao Peifang see Zhong Yaling 258
Yuan Quan see Wu Hua 83
Yu Baotian see Hu Zongding 43
Yu Yuguo
——Wang Changying
Steady-state simulation of ammonia synthesis loop 195
Yu Zhiqing see Jin Yong 26

Zhang Huanzhi see Song Mingshi 178
Zhang Junli see Song Weiduan 248
Zhang Liaosheng see Dong Wenbao 134
Zhong Yaling
——Zhu Bingchen; Fang Dingye; Yao Peifang
Kinetics of methanol synthesis in the presence of C301 Cu-based catalyst (II) Effectiveness factors of parallel reactions 258
Zhon Lixing
Numerical modeling of suspension two-phase flows and their combustion
——Current status and development 240
Zhu Baolin see Wu Hua 83
Zhu Bingchen see Huang Libin 34; see Song Weiduan 248; see Zhong Yaling 258
Zhu Mingjiao see Song Weiduan 248
Zhu Xiulin
——Wang Kai; Pan Zuren
Velocity distribution and energy dissipation for the flow of highly-viscous fluid in the agitated vessel with an anchor impeller 206
